Currency-linked Deposit Online Subscription Demo

Not the same as buying the Linked Currency - Investment in CLD is not the same as buying the Linked Currency directly.

Market risk - The return of CLD is linked to the exchange rates of the Deposit Currency against the Linked Currency. Movements in exchange rates can be unpredictable, sudden and drastic, and affected by complex political and economic factors.

No guarantee or collateral - CLD is not secured by any collateral, and is subject to the "Credit and insolvency risks of the Bank" as mentioned in "Currency-linked Deposit Important Facts Statement".

No first priority to collateral realization proceeds - CLD is not backed by any collateral, thus you are no longer having the right to realize the collateral or gain any priority to the entire collateral realization proceeds.

Credit and insolvency risks of the Bank - When you invest CLD, the Bank has performance obligations to you and you will be relying on the Bank's creditworthiness, internal systems, process and procedures to fulfill such obligations. If the Bank becomes insolvent or defaults on its obligations under CLD, the settlement of the CLD is subject to the credit and insolvency risks of the Bank itself, and you will be ranked as an unsecured creditor of the Bank. In the worst case, you may lose your entire Principal Amount and receive no interest, irrespective of the performance of the Linked Currency and the terms of your CLD.

No liquid secondary market - There is no secondary market for you to sell your CLD prior to its maturity. If you try to sell your CLD, you may not be able to find a buyer.

Liquidity risk - CLD is designed to be held till maturity. You do not have a right to request early termination of this product before maturity.

Currency risk - If the Deposit Currency and/or Linked Currency is not in your home currency, and you choose to convert it back to your home currency upon maturity, you may make a gain or loss due to exchange rate fluctuations.

Risks of early termination by the Bank - The Bank has the right (but not the obligation) to terminate the CLD early upon occurrence of certain events. If CLD is terminated by the Bank early, you may suffer a substantial loss under this product as described in the section "Can the Bank adjust the terms or early terminate the products" in "Currency-linked Deposit Important Facts Statement".

Concentration issues - You should avoid excessive investment in any single type of investment.

Risk relating to Renminbi (applicable to CLD which involves CNY)-

- **Market and Currency Risk:** If the Deposit Currency or the Linked Currency is CNY, you should note that the value of Renminbi against other currencies fluctuates and will be affected by the PRC's government control (for example, the PRC government regulates conversion between Renminbi and other currencies), which may result in a loss of value under the CLD if you subsequently convert Renminbi to another currency (including Hong Kong dollars).
- **Conversion of Renminbi:** Renminbi is currently not freely convertible. There is a limited pool of Renminbi outside the PRC and any tightening of foreign exchange control by the government may adversely affect the liquidity of offshore Renminbi. Conversion of Renminbi through the Bank is subject to the restriction specified by regulatory requirements, the position of the Bank and the Bank's commercial decisions at the relevant time.
- **Different Markets of Renminbi:** Although both onshore Renminbi and offshore Renminbi are the same currency, they are traded in different and separated markets. As the two markets are independently where the flow between them is highly restricted, onshore Renminbi and offshore Renminbi are currently traded at different exchange rates and their movements may be in different directions or scales. The offshore Renminbi exchange rate may deviate significantly from the onshore Renminbi exchange rate.

I/We hereby agree and acknowledge that for the purposes of the Currency-linked Deposit Terms and Conditions (the "Terms and Conditions"), the above Important Risk Warning shall constitute the Risk Disclosure Statement (as defined in the Terms and Conditions) and we shall be deemed to have signed such statement.
